SUMMARY

As an adaptable and results-driven Data Scientist, bring deep expertise in statistical modeling, machine learning, and advanced analytics to solve complex business challenges. leverage proficiency in Python, SQL, and visualization libraries such as Matplotlib and Seaborn, Statistical Analysis to design and implement scalable, end-to-end data solutions that fuel actionable insights. With keen critical thinking, meticulous attention to detail, and a passion for continuous innovation.

TECHNICAL SKILLS

- Python (Pandas, NumPy, Scikit-learn)
- Flask
- SQL
- Data Visualization (Matplotlib, Seaborn)
- Machine Learning
- Statistical Analysis
- Tools (Jupyter Notebook, Google Colab, Excel)

SOFT SKILLS

- Problem-Solving
- Critical Thinking
- Attention to Detail
- Adaptability

EDUCATION

Bachelor of Vocation in Software Development
Guru Nanak College, Budhlada

July 2022 – Perusing

CERTIFICATIONS

Certificate in Data Science Using Python
CETPA Infotech Pvt. Ltd., Noida

Feb 2025 – Perusing

Artificial Intelligence & Data Science
Jagat Guru Nanak Dev Punjab State Open University, Patiala

July 2023 – Dec 2023

PROJECTS

1. Air Quality Data Analysis
 - Cleaned and standardized multi-country air quality data
 - Analysed year-wise AQI trends; categorized air quality levels
 - Forecasted future AQI using statistical projections and pivot modeling
2. COVID-19 Data Analytics Dashboard
 - Cleaned, preprocessed, and visualized national and state-level COVID-19 data
 - Conducted time-series analysis of case trends, active cases, and mortality
 - Identified high-risk states based on severity and population density
